

Swing Trading results

w/s 7-Dec-2020

A total percentage sum of:
0 %

No closed trades last week. When the markets are close to All Time High the frequency of the signals is usually quite low. Normally we need some volatility on the downside to get more trades. We have however two positions and will add one more on Monday morning.

Please see more information

About the signals

- The signals are created by proprietary models that are based on stocks tendencies to overreact in the short term.
- The stocks used in the model are the most liquid stocks in Nastaq and NYSE.
- The trades are generally short and do not use any stop orders since it will reduce performance.
- The signals are sent out to subscribers by email in the morning before each trading day and are also published on the website (available for subscribers).
- The Swing Trading service has a long history with Live results from 2013 for mainly Swedish customers (both Swedish and American stocks).
- For subscription and more information click [here](#)
