Amgen Inc (AMGN)	-0,57%
------------------	--------

Last couple of weeks have been quite active with a lot of trades, but last week was a slow week with only one closed trade. We only take high probability trades and we will wait until we get good signals. That is an important part of the edge.

About the signals

- The signals are created by proprietary models that are based on stocks tendencies to overreact in the short term.
- The stocks used in the model are the most liquid stocks in Nastaq and NYSE.
- The trades are generally short and do not use any stop orders since it will reduce performance.
- The signals are sent out to subscribers by email in the morning before each trading day and are also published on the website (available for subscribers).
- The Swing Trading service has a long history with Live results from 2013 for mainly Swedish customers (both Swedish and American stocks).
